TANGUTURI SAI DEEPIKA

Undergraduate Student | Information Technology

Malineni Lakshmaiah Women's Engineering College, Guntur, India

saideepikatanguturi7@gmail.com | linkedin.com/in/saideepikatanguturi | github.com/saideepika07

SUMMARY

Information Technology undergraduate with knowledge of full-stack MERN development, including frontend and backend technologies using Python, React.js, Node.js, Express.js, and MongoDB. Skilled in cloud technologies, including ServiceNow (Certified System Administrator) and AWS. Strong foundation in Database Management Systems, Operating Systems, Computer Networks, and System Design, with hands-on experience through hackathons and personal projects. Passionate about software development and eager to apply technical skills in internships and real-world projects.

EDUCATION

Malineni Lakshmaiah Women's Engineering College Guntur, India

Bachelor of Technology in Information Technology, CGPA: 7.8/10 2023 – 2027

TECHNICAL SKILLS

Programming Languages: Python, JavaScript (Basic), TypeScript (Basic)

Backend Development: Express.js, Node.js

Frontend Development: React.js, Next.js, Tailwind CSS, HTML, CSS

Databases: MongoDB, MySQL, Supabase (PostgreSQL)

Cloud Technologies: ServiceNow (Certified System Administrator), AWS

Relevant Coursework: Database Management Systems, Operating Systems, Computer Networks, System Design

PROJECTS

CleanCycle: Smart Community Waste Segregation & Collection System October 2026

Tech Stack: Next.js, TypeScript, Tailwind CSS, Supabase (PostgreSQL, Auth, Row Level Security, Realtime), IndexedDB, Vercel

GitHub: saideepika07/cleancycle

- Built a real-time waste segregation platform (wet, dry, reject) with resident, collector and admin dashboards, using Next.js, TypeScript and Supabase.
- Designed a PostgreSQL schema with Row Level Security, triggers and views, so each role sees only its own community's data.
- Implemented offline-first collection using an IndexedDB queue and idempotent sync, with no duplicate records in testing.
- Built an admin analytics dashboard with a weighted Community Green Score, and deployed on Vercel with a multilingual UI (English, Telugu, Hindi).

STHAVYA: AI Home Planning Platform

Tech Stack: React, TypeScript, Node.js, Express, MongoDB, Socket.io, JWT, Gemini API, Vercel, Render

GitHub: saideepika07/Sthavya

- Built a web app where you enter your plot size, BHK and budget, and get a separate blueprint for every floor, from ground up to G+4 with an optional penthouse.
- Made the backend with Node, Express and MongoDB, with secure login using JWT and password hashing.
- Used Gemini to review the floor plans, and Socket.io to show booking updates live.
- Added PDF download for the blueprints and deployed everything online (Vercel, Render, MongoDB Atlas).

ACHIEVEMENTS & CERTIFICATIONS

- **1st Prize Winner:** 36-Hour Hackathon conducted by Malineni Lakshmaiah Women's Engineering College.
- **Certification:** ServiceNow Certified System Administrator (CSA) - Global Cloud Technology Certification.
- **NCC Certified Cadet:** Achieved Lance Corporal rank and earned Grade 'A' Certificate.
